

Adobe Systems Incorporated February, 2013

Adobe Systems Incorporated

Financial Disclaime

Some of the information discussed today contains forward-looking statements that involve risk and uncertainty. Actual results may differ materially from those set forth in such statements. For a discussion of the risks and uncertainties, you should review Adobe's SEC filings, including the annual report on Form 10-K for fiscal year 2012 and the quarterly reports on Form 10-Q filed by the company in 2013. In our presentation, we will discuss non-GAAP financial measures. The GAAP financial measures that correspond to such non-GAAP measures, as well as the reconciliation between the two, are available on our website at http://www.adobe.com/ADBE.

Adobe does not undertake an obligation to update forward-looking statements.

Δ

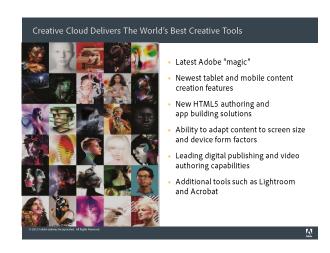

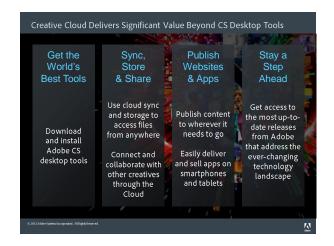

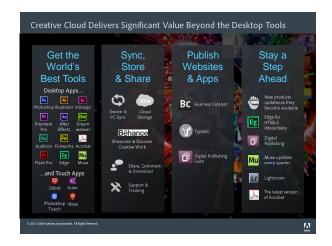

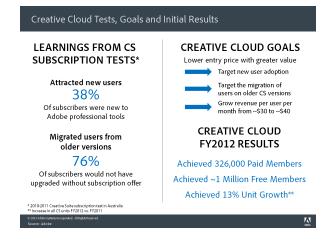

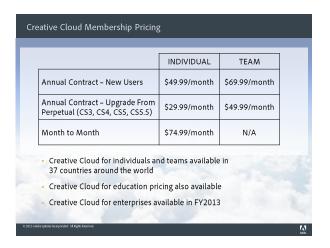

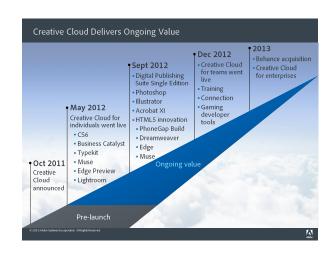

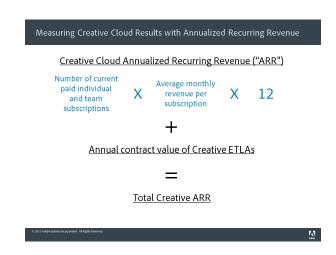

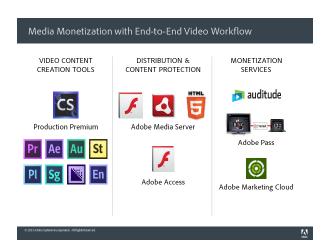

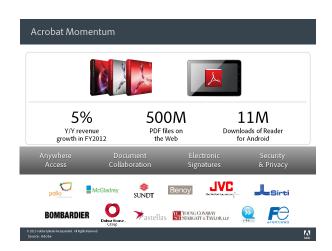

Creative Cloud Momentum			
Metric	Q4 FY12	Q3FY12	Q2 FY12
Total paid subscriptions exiting the quarter	326,000	194,000	~100,000
Percentage on Annual (vs. month-to-month)	90%	88%	79%
Percentage with full Creative Cloud (vs. point products)	81%	79%	66%
Creative Annualized Recurring Revenue (millions)	\$153	\$90	\$43
Creative Cloud ARR (millions)	\$146	\$90	-
Creative ETLA* Annual Contract Value (millions)	\$7	-	-

- Added 132,000 net new subscriptions in Q4 FY2012
- Excludes enterprise ETLA users
- Includes users from Creative Cloud for teams

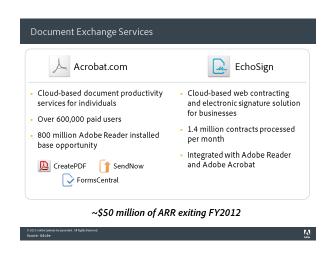

* Enterprise Ferm License Agreement
62013 Adde system Insuprated. All fights Decreed.

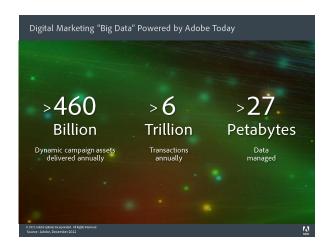

Digital Media Summary

STRATEGY

Drive Creative Cloud subscriptions and new user acquisition to increase revenue growth and recurring revenue

KEY INITIATIVES

- Content creation innovation
- Mobile development
- Digital publishing
- Creative community
- Integration with Marketing Cloud
- Document exchange services

MARKET OPPORTUNITY

 2015 TAM

 Creative Tools
 \$4.4B

 Creative Cloud Services
 \$2.0B

 Acrobat/Document Services
 \$2.1B

~\$8B Addressable Market for Adobe

Bocament exendings services

W

Progress Against 2011 Financial Analyst Meeting Goals December 13, 2013

- Over-achieved with adoption of Creative Cloud in FY12
- Grew total Creative units by 13%, versus a target of 10%
- Exited the year with 326,000 paid subscriptions and over one million free members
- Anticipate we will complete the bulk of the transition to a Creative subscription model sooner than the previously stated time frame of four years
 - Expect to grow individual and team Creative Cloud paid subscriptions by the end of 2015 to approximately 4 million subscribers
- After FY13, we believe reported revenue from our Creative Cloud and CS product family will achieve a CAGR of over 15% from FY14 through FY16
- On pace to achieve a billion dollar run rate with Adobe Marketing Cloud by the end of 2013, growing 25% in bookings and 20% in reported revenue
- On track to drive 40% of Adobe's overall revenue to be recurring by the end of 2013, one year ahead of our target

The information discussed on this slide contains forward looking statements that involve risk and uncertainty. Actual results may differ materially. For discussion of these risks and uncertainties, you should review Adobe's SEC fillings.

The above results are supplied to provide meaningful supplemental information regarding Adobe's core operating results because such information excludes amounts that are not necessarily related to its core operating results. Adobe uses this non-GAAP financial information in assessing the performance of the Company's ongoing operations, and for planning and forecasting in future periods. This non-GAAP information should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP.

MIKE SAVIAGE

Good afternoon and thank you for joining us today. Joining me on the call are Adobe's President and CEO, Shantanu Narayen, as well as Mark Garrett, Executive Vice President and CFO.

In the call today, we will discuss Adobe's fourth quarter and fiscal year 2012 financial results. By now, you should have a copy of our earnings press release which crossed the wire approximately one hour ago. If you need a copy of the press release, you can go to Adobe.com under the Company and News Room links to find an electronic copy.

Financial Disclaimer

Some of the information discussed in this presentation, particularly our revenue, subscription and operating model targets, and our forward-looking product plans, is based on information as oftoday, December 13, 2012, and contains forward-looking statements that involve risk and uncertainty.

Actual results may differ materially from those set forth in such statements.

For a discussion of these risks and uncertainties, you should review the Forward-Looking Statements Disclosure in our press releases issued today, and Adobe's SEC filings, including our annual report on Form 10-K for fiscal 2011, and our quarterly reports filed on Form 10-Q in fiscal 2012.

During this presentation, we will discuss non-GAAP financial measures. The GAAP financial measures that correspond to non-GAAP financial measures, as well as the reconciliation between the two, are available on our <u>Website</u>.

Δ

Before we get started, I want to emphasize that some of the information discussed in this call, particularly our revenue, subscription and operating model targets, and our forward-looking product plans, is based on information as of today, December 13th, 2012, and contains forward-looking statements that involve risk and uncertainty. Actual results may differ materially from those set forth in such statements. For a discussion of these risks and uncertainties, you should review the Forward-Looking Statements Disclosure in the earnings press release we issued today, as well as Adobe's SEC filings.

During this call, we will discuss GAAP and non-GAAP financial measures. A reconciliation between the two is available in today's earnings release and on our <u>Investor Relations website</u> in the Investor data sheet.

Call participants are advised that the audio of this conference call is being broadcast live over the Internet in Adobe Connect, and is also being recorded for playback purposes. An archive of the call will be made available on Adobe's Investor Relations website for approximately 45 days, and is the property of Adobe. The audio and archive may not be re-recorded, or otherwise reproduced or distributed without prior written permission from Adobe.

I will now turn the call over to Shantanu.

SHANTANU NARAYEN

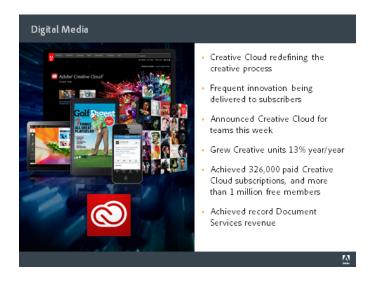

Thanks Mike and good afternoon.

I am pleased to report we delivered record revenue of \$1 billion 153 million dollars in Q4. This performance helped us achieve record revenue of \$4.4 billion in fiscal year 2012.

At Adobe we are focused on two large market opportunities: Digital Media and Digital Marketing.

2012 was a milestone year in terms of innovation with our Creative Cloud and Adobe Marketing Cloud.

We achieved great success in both these areas.

In the Digital Media business, we are redefining the creative process with Creative Cloud. Through frequent product and feature enhancements, new cloud services and attractive pricing, Adobe is changing how we provide value to a broader set of customers. We will deliver customized offerings for individuals, workgroups and large enterprises. As with all successful subscription services, we are offering a free trial program. This enables an easy on-ramp and a funnel of prospects that we intend to convert to paying subscribers.

Since we launched the individual Creative Cloud offering in May, we have already delivered three updates to the service. Earlier this year, we added Lightroom to the Creative Cloud, as well as new features for Dreamweaver and Illustrator. Since then, we have provided new HTML products, including Edge and Muse; and this week we delivered major feature enhancements to Photoshop and Digital Publishing Suite. We also introduced a sync and store capability, which will enable our creative customers to share and collaborate.

We are now shipping Creative Cloud for teams, which includes central administration of licenses, expert support, online training and collaboration features. Creative Cloud for enterprises, which we will deliver in 2013, integrates with Digital Publishing Suite and the Adobe Marketing Cloud, with digital asset management being an obvious area of integration. We have begun transitioning enterprise customers to Enterprise Term License Agreements, which provide them cloud services and updates to our desktop tools. Pricing for each segment is designed to reward loyal customers and aggressively transition them to the Cloud.

Response to the Creative Cloud exceeded our expectations, helping us grow total Creative units by over 13%. As of the end of the year, we had 326,000 paid memberships and over one million free Creative Cloud members. As a result, in our Creative business we exited FY12 with \$153 million in annualized recurring revenue. Based on overwhelmingly positive customer feedback, our results to date, and the roadmap of new innovation planned for the coming year, we intend to accelerate customer transition to the Creative Cloud in 2013.

In Document Services, we launched Acrobat XI with newly integrated cloud services, including web contracting with Adobe EchoSign and forms creation, data collection, and analysis with FormsCentral.

Acrobat and these document services had record revenue in 2012.

Three years ago we embarked on a strategy to create a new business for Adobe. Through organic innovation and acquisitions, we have become a market leader in the explosive digital marketing category. Our Adobe Marketing Cloud enables marketers to deliver personalized web experiences across multiple devices, manage multichannel campaigns and optimize media monetization. We target chief marketing officers, chief revenue officers, advertising agencies, publishing executives and digital marketers with our solutions.

Our five Adobe Marketing Cloud solutions are architected to provide best-of-breed capabilities across analytics, online targeting, media optimization, social media and web experience management. By consolidating our 30 distinct offerings, we have simplified our messaging and made it easier for customers to license and implement our solutions. In addition to innovating on the product side, we intend to aggressively evangelize the benefits of digital in the evolution of marketing.

We believe Digital Marketing will be a multi-billion dollar category, and 2012 was a great year for Adobe as we established ourselves as the leader in analytics, online targeting and media optimization. In web experience management, we have the fastest growing solution in the space, doubling our market share over the past two years. As a result, we drove over \$220 million of revenue in Q4, and achieved 35% annual revenue growth for the year.

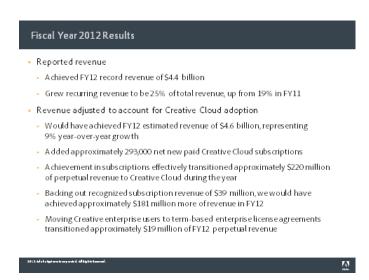

In summary, 2012 was an outstanding year of accomplishments against our strategic priorities. We enter 2013 in a strong position. Now, I'll turn it over to Mark.

MARK GARRETT

Thanks Shantanu.

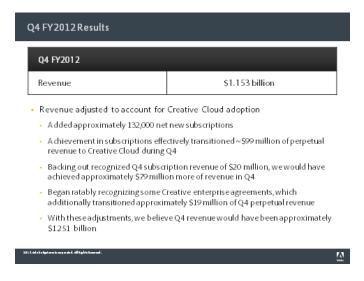

Our earnings report today covers both Q4 and fiscal year 2012 results.

Adobe achieved record revenue of 4 billion 404 million dollars in the year, compared to 4 billion 216 million dollars in fiscal 2011. Our success in fiscal 2012 demonstrates significant progress

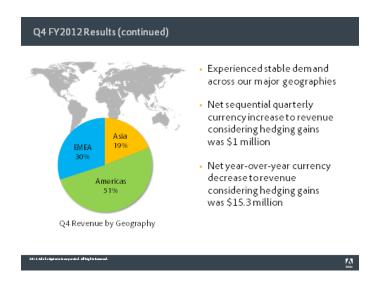

toward our goal of transforming our business and building a predictable revenue stream. In 2012, 25% of our revenue was recurring, up from approximately 19% in FY 2011.

In fiscal 2012, we added approximately 293,000 net new paid subscriptions. Using an ASP of \$750, this achievement in subscriptions effectively transitioned approximately \$220 million of perpetual revenue to Creative Cloud during the year. Backing out recognized subscription revenue of \$39 million, we would have achieved approximately \$181 million more of revenue in FY12. Additionally, moving to term based enterprise license agreements transitioned approximately \$19 million of FY12 perpetual revenue. After these adjustments, we believe FY12 revenue would have been approximately \$4.6 billion, representing 9% year-over-year growth.

In the fourth quarter of fiscal 2012, Adobe achieved record revenue of 1 billion 153 million dollars – exceeding our targeted range of 1 billion 75 million to 1 billion 125 million dollars.

We continued to accelerate adoption of Creative Cloud subscriptions. In Q4 we added approximately 132,000 net new paid subscriptions. Using an ASP of \$750, this achievement in subscriptions effectively transitioned approximately \$99 million of perpetual revenue to Creative Cloud in Q4. After backing out recognized Q4 subscription revenue of \$20 million, we would have achieved approximately \$79 million more of revenue in Q4. We also began to ratably recognize some enterprise agreements, which additionally transitioned approximately \$19 million of Q4 perpetual revenue. With these adjustments, we believe Q4 revenue would have been approximately \$1.251 billion.

We experienced stable demand across our major geographies.

From a currency perspective, quarter-over-quarter FX rate changes had a \$6.7 million positive impact on reported revenue. Hedging gains contributed \$2 million to revenue in Q4 FY12, versus \$7.7 million in Q3 FY12, thus the net sequential quarterly currency increase to revenue considering hedging gains was \$1 million.

Year-over-year, FX rate changes had a \$13.7 million negative impact on reported revenue. Comparing the \$2 million in Q4 FY12 hedging gains to the \$3.6 million of hedging gains in Q4 FY11, the net year-over-year currency decrease to revenue considering hedging gains was \$15.3 million.

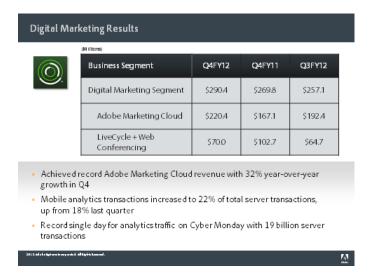

Employees at the end of Q4 totaled 11,144 versus 10,811 at the end of last quarter. The sequential increase was driven primarily by hiring in our field organization.

Our ending deferred revenue balance increased by \$59.3 million to a record \$619.6 million. As a reminder, Creative Cloud subscriptions are billed monthly, and are not reflected in deferred revenue on the balance sheet. Our trade DSO was 49 days, which compares to 50 days in the year-ago quarter, and 48 days last quarter.

During the quarter, cash flow from operations was \$473.7 million. Our ending cash and short-term investment position was \$3.54 billion, compared to \$3.25 billion at the end of Q3. More than 80% of our cash is offshore.

In Q4 we repurchased approximately 2 million shares at a total cost of \$67 million. For the year we repurchased approximately 11.5 million shares at a total cost of \$372 million.

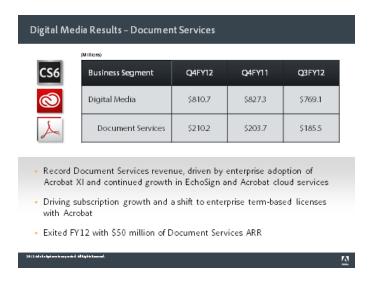

I will now discuss business segment results.

Our Digital Marketing segment is made up of two components. The first is revenue from our Adobe Marketing Cloud, which we previously referred to as Digital Marketing Suite. During the quarter, we achieved record Adobe Marketing Cloud revenue of \$220.4 million. This represents Q4 year-over-year growth of 32%.

Adobe Marketing Cloud analytics transactions in the quarter were 1.74 trillion, up 17% year-over-year. Mobile device use continues to be a driver in our analytics business; mobile transactions increased to 22%, up from 18% last quarter. On Cyber Monday we achieved a single day traffic record with 19 billion server transactions, up from the previous record of 17.5 billion last year.

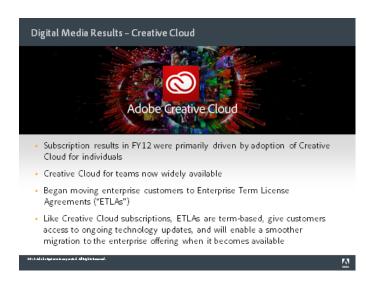

The second component of our Digital Marketing segment is revenue from the LiveCycle and Connect businesses. LiveCycle and Connect contributed \$70 million in Q4 revenue, down as expected from the \$102.7 million we achieved in Q4 of FY11.

In our Digital Media segment, we achieved revenue of \$810.7 million. The two major components of revenue are our Creative family of products and our Document Services products.

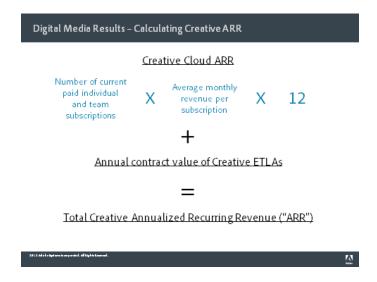

In Document Services, the new Acrobat release achieved strong enterprise adoption. That, plus continued growth in EchoSign, our electronic contract solution, and Acrobat cloud services, drove record revenue in Q4 of \$210.2 million. Similar to the Creative business, we are driving subscriptions growth and a shift to enterprise term-based licenses. As a result, we exited the year with approximately \$50 million in annualized recurring revenue in Document Services.

I'd now like to discuss our Creative Cloud business.

Our strategy is to provide differentiated offerings for our Creative Cloud customers. During fiscal 2012, our subscription results were primarily driven by adoption of Creative Cloud for individuals. Towards the end of Q4 we had a limited release of Creative Cloud for teams, which became widely available this week.

In 2013, we will be offering Creative Cloud to enterprise customers. In anticipation of transitioning enterprise customers to Creative Cloud, during Q4 we began moving them to Enterprise Term License Agreements, or ETLAs. Like Creative Cloud subscriptions, ETLAs are term-based, give customers access to ongoing technology updates, and will enable a smoother migration to the enterprise offering when it becomes available.

Earlier this year we introduced several metrics to help you understand our progress with Creative Cloud adoption. They included total number of subscriptions and Annualized Recurring Revenue, or ARR. ARR is calculated by multiplying the number of current paid subscriptions, by the average monthly revenue per user per month, multiplied by twelve. We also provided a methodology to correlate the value of our new subscribers to revenue we would have recognized if those customers had licensed perpetual software, assuming a transaction value based on product mix.

As our enterprise customers migrate to ETLAs, some of these contracts involve estimated numbers of licenses rather than precise registered user information. As such, we have decided we should exclude enterprise-based subscriptions from our Creative Cloud subscription count. However, because revenue from ETLAs is recognized ratably, we will include the annual contract value of ETLAs in our Creative ARR calculations.

Digital Media Results – Creative Cloud Metrics									
Metric	Q4 FY12	Q3FY12	Q2 FY12						
Total paid subscriptions exiting the quarter	326,000	194,000	~100,000						
Average subscription additions per week	10,000	8,000	~5,000*						
Percentage on Annual (vs. month-to-month)	90%	88%	79%						
Percentage with full Creative Cloud (vs. point products)	81%	79%	66%						
Added 132,000 net new subscriptions in Q4 Excludes enterprise ETLA users									

- Includes users from Creative Cloud for teams
- · Average subscriptions per week increased to 10,000
- · 90% are on Annual plan and 81% have full Creative Cloud offering

Now I would like to review our recent Creative Cloud results.

During the fourth quarter, we continued to accelerate the adoption of Creative Cloud subscriptions. We added approximately 132,000 net new individual and team subscriptions during the quarter. To reiterate, these do not include enterprise users who are covered under ETLA agreements.

In Q4, we averaged 10,000 new subscriptions per week, up from 8,000 per week in Q3. Exiting Q4, 90% of subscribers are on an annual subscription versus month-to-month; and 81% of subscribers are subscribed to the full Creative Cloud versus point product subscriptions.

Digital Media Results – Creative ARR Metric Q4 FY12 Q3FY12 Q2 FY12 Creative Annualized Recurring Revenue (millions) \$153 \$90 \$43 Creative Cloud ARR (millions) \$146 \$90 Creative ETLA Annual Contract Value (millions) \$7

- Adobe.com is increasingly becoming the preferred way for our customers to engage with us
 - 28% of all Creative subscriptions and perpetual units were licensed via Adobe.com in FY12 (up from 18% last year)
- Achieved 13% year-over-year Creative unit growth in FY12

2013 deleteratury odel displetament.

We exited Q4 with Creative ARR of \$153 million, up from \$90 million of ARR exiting Q3. \$146 million of ARR was from Creative Cloud individual and team subscriptions. The remaining \$7 million was from the annual contract value of ETLAs signed in Q4.

Adobe.com is increasingly becoming the preferred way for our customers to engage with us. 28% of all Creative subscriptions and perpetual units were licensed via Adobe.com in FY12, up from 18% last year.

With Creative Cloud for individuals and teams now available, and with our sales team migrating enterprise customers to ETLAs, we are in a position to utilize all our routes to market to help accelerate customer migration to Creative Cloud. At our last analyst meeting, we reported that total Creative product units have been at approximately 3 million units per year for each of the past four years. We disclosed our goal to increase total perpetual and subscription units by 10% this year. I'm pleased to report that we grew Creative units 13% in FY12.

Now let's look at Q1 and FY13.

For the first quarter of fiscal 2013, we are targeting a revenue range of \$950 million to \$1 billion dollars.

In Digital Media we expect to exit Q1 with approximately \$215 million of Creative ARR – up from \$153 million in Q4. The estimated Q1 Creative ARR is based on adding slightly fewer new Creative Cloud paid subscriptions than what we achieved in Q4 due to normal Q4 to Q1 seasonality.

In Document Services, we expect to exit Q1 with approximately \$60 million of Document Services ARR – up from \$50 million in Q4.

Adding Creative ARR to Document Services ARR yields a total Digital Media ARR exiting Q1 of approximately \$275 million.

Assuming the midpoint of our targeted revenue range, we expect Digital Media reported revenue to be down sequentially due to continued migration to Creative Cloud subscription and ETLAs, as well as normal Q1 seasonality. In our Digital Marketing segment, we expect Adobe Marketing Cloud Q1 revenue to be relatively flat with Q4 revenue, coupled with a sequential decline in our LiveCycle and Connect businesses. We expect Print and Publishing to also be flat quarter-over-quarter.

In addition, we are targeting our Q1 share count to be 503 million to 505 million shares. We are targeting non-operating expense to be between \$19 million and \$21 million on both a GAAP and non-GAAP basis. We are targeting a Q1 GAAP tax rate of 28%, and a non-GAAP tax rate of 22.5%.

These targets yield a Q1 GAAP earnings per share range of eight cents to fourteen cents per share, and a Q1 non-GAAP earnings per share range of 26 cents to 32 cents.

Now I would like to discuss fiscal 2013.

We expect to exit FY13 with over 1.25 million paid Creative Cloud individual and team subscriptions. We expect the impact of these subscriptions and continued adoption of ETLAs to effectively transition approximately \$690 million of reported perpetual revenue to subscriptions next year, and to exit the year with a total ARR of approximately \$685 million.

In Document Services, in order to drive consistency in how we sell to enterprise customers, we have begun to migrate many of our large Acrobat customers to ETLAs. As a result, we expect Document Services reported revenue to be approximately \$750 million in FY13, with an additional \$80 million of perpetual revenue transitioned to ETLAs that will be ratably recognized. Together, this results in a targeted growth rate in Document Services of 5% to 7%.

Combining Acrobat ETLAs and cloud-based services, we expect to exit FY13 with \$115 million of Document Services ARR. FY13 will be the pivotal year in our transition to a subscription model, and we expect to exit the year with approximately \$800 million of Digital Media ARR.

As the leader in the Digital Marketing segment, we will continue to invest in this explosive growth category. By focusing on the five solution areas in the Adobe Marketing Cloud, we expect to grow bookings by over 25%, yielding reported revenue growth of over 20%. In just a few years, we will have built a brand new, billion dollar business for Adobe. We expect LiveCycle and Connect to continue to decline, but to contribute an estimated \$200 million of revenue during FY13. We expect Print and Publishing to be flat year-over-year.

We expect total Adobe reported revenue in FY13 to be approximately \$4.1 billion. We will closely manage expenses during this upcoming transition year, and expect earnings per share to be approximately \$0.62 on a GAAP-basis, and \$1.40 on a non-GAAP basis. Keep in mind, the \$770 million of revenue effectively transitioned from perpetual to subscription and ETLAs equates to approximately \$1.20 of non-GAAP EPS.

Progress Against 2011 Financial Analyst Meeting Goals Over-achieved with adoption of Creative Cloud in FY12 - Grew total Creative units by 13%, versus a target of 10% · Exited the year with 326,000 paid subscriptions and over one million free members · Anticipate we will complete the bulk of the transition to a Creative subscription model sooner than the previously stated time frame of four years - Expect to grow individual and team Creative Cloud paid subscriptions by the end of 2015 to approximately 4 million subscribers · After FY13, we believe reported revenue from our Creative Cloud and CS product family will achieve a CAGR of over 15% from FY14 through FY16 · On pace to achieve a billion dollar run rate with Adobe Marketing Cloud by the end of 2013, growing $\,25\%$ in bookings and 20% in revenue. On track to drive 40% of Adobe's overall revenue to be recurring by the end of 2013, one year ahead of our target The information discussed on this slide contains toward booking state reins that involve risk and uncertainty. Actual escults may drifter materially. For a discussion of these risk and uncertainties, you should eview Adole's SEC fillings. المساورة والمراجع المراجع والمراجع والم

At our analyst meeting last November, we said we would redefine the creative process and deliver an amazing set of products and services for our customers, available via a new subscription model. In FY12, we over-achieved our goals by growing total Creative units by 13%. We exited the year with 326,000 paid subscriptions, and over one million free members.

At the analyst meeting, we said the transition to a Cloud model would be complete within four years. Based on our success in FY12 and our plans for FY13, we anticipate we will complete the bulk of the transition sooner than that, with approximately 4 million individual and team Creative Cloud paid subscriptions by the end of 2015. After FY13, we believe reported revenue from our Creative Cloud and CS product family will achieve a CAGR of over 15% from FY14 through FY16.

We said by the end of 2014 we would build a billion dollar business in Digital Marketing. With the success we've achieved in FY12 we're on pace to achieve a billion dollar run rate by the end of 2013, growing 25% in bookings and 20% in revenue.

We said that by the end of 2014, 40% of Adobe's overall revenue would be recurring. We're on track to achieve this goal exiting the end of 2013.

While FY13 is a transition year, we are confident that our strategy and our execution show that the company is better positioned than it has ever been. We are committed to providing continued transparency to demonstrate progress as we reinvent the company.

I'd now like to turn the call back over to Shantanu.

SHANTANU NARAYEN

Thanks Mark. These are exciting times at Adobe.

Last year we outlined a strategy to reinvent the company and accelerate growth by focusing on the Digital Media and Digital Marketing categories. I am pleased to report we are ahead of schedule in our transformation.

We continue to be the undisputed leader in Digital Media, and in just seven months since the launch of the Creative Cloud, we have over 326,000 paid subscriptions and \$153 million of ARR. We are a leader in Digital Marketing, with the most comprehensive offering and the inside track with the marketing community. This business, which didn't exist three years ago at Adobe, is on pace to reach a billion dollars in annual revenue.

As we close the year, we see huge opportunity for Adobe ahead. The dramatic shift we are making in our business is really not different than what we've done for the past thirty years. Innovation is in our blood. It defines us, and galvanizes our employees. We look forward to 2013.

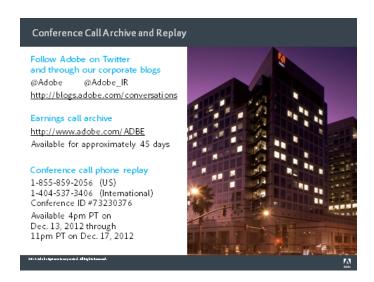

Thank you for joining us today. Now, I'll turn the call back over to Mike.

MIKE SAVIAGE

Thanks Shantanu.

Before we begin Q&A I have a few logistics items to go over.

First, for those investors and financial analysts who want to stay current on the latest Adobe news, we encourage you follow Adobe on Twitter, Facebook and YouTube, and to frequently check Adobe's corporate blogs on blogs.adobe.com. We are increasingly using blogs and social channels as a primary means to communicate important information. In addition, tv.adobe.com is a great resource to learn more about Adobe's products and solutions, and check out new customer case studies. We have updated Adobe's Investor Relations website to provide easier access to these resources.

During fiscal 2013, Adobe Investor Relations will also begin to use Twitter to highlight news and interesting stories or articles which will help the investment community stay on top of what's happening. Follow "Adobe_IR" on Twitter to track what we have to say.

Second, I'd like to highlight the invitation we sent out last week to attend our upcoming Digital Marketing Summit in March. There's no better way to immerse yourself into the opportunities we see in this explosive category, and how Adobe is best positioned to win in this market. Contact Adobe Investor Relations to get more information for how to attend.

And third, I'd like to highlight that we've slightly modified our segment reporting for fiscal 2013. We have moved our video server solutions products from Digital Media to Digital Marketing, to better align the role of how Adobe can help its customers monetize their video assets with our Digital Marketing solutions. The updated IR datasheet we've published today contains a page with the new segments by product name. An updated IR datasheet with restated revenue by segments will be made available by the end of January, around the time our 10-K is filed. For reference, the amount of Q4 revenue that will be moving from Digital Media to Digital Marketing is less than \$10 million.

In regard to today's earnings report, we have posted several documents on our IR web site – including a copy of the script containing our prepared remarks for today's call. Given the new detailed information we've provided today, the script should be a useful resource to assist with modeling our business.

To access these documents and the other investor-related information, go to www.adobe.com/ADBE.

For those who wish to listen to a playback of today's conference call, a web-based Adobe Connect archive of the call will be available from the IR page on Adobe.com later today. Alternatively, you can listen to a phone replay by calling 855-859-2056; use conference ID #73230376. Again, the number is 855-859-2056 with ID #73230376. International callers should dial 404-537-3406. The phone playback service will be available beginning at 4pm Pacific Time today, and ending at 4pm Pacific Time on Monday December 17th, 2012.

We would now be happy to take your questions. Operator.

FOR IMMEDIATE RELEASE

Adobe Reports Record Quarterly and Annual Revenue

Company Drives Strong Adobe Creative Cloud and Adobe Marketing Cloud Adoption in Fiscal 2012

SAN JOSE, Calif. — **Dec. 13, 2012** — Adobe Systems Incorporated (Nasdaq:ADBE) today reported financial results for its fourth quarter and fiscal year ended Nov. 30, 2012.

Adobe achieved revenue in Q4 FY2012 of \$1.153 billion, exceeding its targeted range of \$1.075 billion to \$1.125 billion. During the quarter, the Company continued to accelerate adoption of Adobe Creative Cloud as it migrates to a subscription model. Adobe also achieved record Adobe Marketing Cloud and Document Services revenue during the fourth quarter.

For fiscal year 2012, Adobe achieved record revenue of \$4.4 billion.

Fourth Quarter Financial Highlights

- Diluted earnings per share were \$0.44 on a GAAP-basis, and \$0.61 on a non-GAAP basis.
- Operating income was \$307.8 million and net income was \$222.3 million on a GAAP basis. Operating income was \$414.7 million and net income was \$307.9 million on a non-GAAP basis.
- Cash flow from operations was \$473.7 million.
- Deferred revenue grew by \$59.3 million to a record \$619.6 million.
- Adobe added approximately 10,000 Creative Cloud subscriptions per week during the quarter, versus the addition of 8,000 subscriptions per week in the third quarter.
- In Document Services, which includes the Adobe Acrobat product family, Adobe also achieved record revenue of \$210.2
 million during the quarter.
- Adobe Marketing Cloud achieved record quarterly revenue of \$220.4 million, which represents 32 percent year-over-year growth.

A reconciliation between GAAP and non-GAAP results is provided at the end of this press release.

Fiscal Year 2012 Financial Highlights

Adobe achieved record revenue of \$4.404 billion. Annual GAAP diluted earnings per share for fiscal 2012 were \$1.66, and annual non-GAAP diluted earnings per share were \$2.35.

- Annual operating income was \$1.180 billion and net income was \$833 million on a GAAP basis. Annual operating income was \$1.597 billion and net income was \$1.183 billion on a non-GAAP basis.
- Adobe generated \$1.5 billion in cash flow during the year.
- Creative Cloud paid subscriptions grew to 326,000 as of the end of the year, with exiting annualized recurring revenue of \$153 million for the Creative business.
- Document Services achieved record annual revenue of \$786 million.
- Adobe Marketing Cloud achieved a record \$777 million in reported annual revenue, representing 35 percent year-over-year growth.
- The company repurchased 11.5 million shares during the year, returning approximately \$372 million of cash to stockholders.

Executive Quotes

"We beat our Creative Cloud subscription goals and established Adobe Marketing Cloud as the leader in the exploding category of Digital Marketing during fiscal 2012," said Shantanu Narayen, president and chief executive officer, Adobe. "In fiscal 2013 we intend to accelerate our pace of innovation, and drive integration between Creative Cloud and Adobe Marketing Cloud."

"We're driving migration to a subscription model in our Creative business faster than we predicted a year ago, and we are confident fiscal 2013 will be the pivotal year for the transition," said Mark Garrett, executive vice president and chief financial officer, Adobe. "This will yield a stronger, more predictable recurring revenue model with higher long-term revenue growth."

Adobe to Webcast Earnings Conference Call

Adobe will webcast its fourth quarter and fiscal year 2012 earnings conference call today at 2:00 p.m. Pacific Time from its investor relations website: www.adobe.com/ADBE. The company will discuss financial targets for the first quarter of fiscal 2013 as well as fiscal year 2013 on its Q4 and FY2012 earnings call. A copy of Adobe management's prepared remarks, including financial targets and conference call slides, has been posted to Adobe's investor relations website in advance of the conference call for reference.

A reconciliation between GAAP and non-GAAP financial targets is also provided on the website.

Forward-Looking Statements Disclosure

This press release contains forward-looking statements, including those related to the transition of our business as we migrate to a subscription model, increases in recurring revenue, long-term revenue growth and our ability to continue to innovate and execute against our strategy in our key growth areas and drive integration between those areas, which involve risks and uncertainties that could cause actual results to differ materially. Factors that might cause or contribute to such differences include, but are not limited to: failure to develop, market and distribute products and services that meet customer requirements, introduction of new products and business models by competitors, failure to successfully manage transitions to new business models and markets, including our increased emphasis on a cloud and subscription strategy, fluctuations in subscription renewal or upgrade rates, continued uncertainty in economic conditions and the financial markets, difficulty in predicting revenue from new businesses and the potential impact on our financial results from changes in our business models, and failure to realize the anticipated benefits of past or future acquisitions.

For a discussion of these and other risks and uncertainties, please refer to Adobe's Annual Report on Form 10-K for the fiscal year ended December 2, 2011 and its Quarterly Reports on Form 10-Q for the fiscal quarters ended March 2, 2012, June 1, 2012 and Aug. 31, 2012.

The financial information set forth in this press release reflects estimates based on information available at this time. These amounts could differ from actual reported amounts stated in Adobe's Annual Report on Form 10-K for our year ended Nov. 30, 2012, which Adobe expects to file in Jan. 2013.

Adobe assumes no obligation to, and does not currently intend to, update these forward-looking statements.

Adobe continues to provide all information required in accordance with GAAP, but believes evaluating its ongoing operating results may not be as useful if an investor is limited to reviewing only GAAP financial measures. Accordingly, Adobe uses non-GAAP financial information to evaluate its ongoing operations and for internal planning and forecasting purposes. Adobe's management does not itself, nor does it suggest that investors should, consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Adobe presents such non-GAAP financial measures in reporting its financial results to provide investors with an additional tool to evaluate Adobe's operating results in a manner that focuses on what Adobe believes to be its ongoing business operations. Adobe's management believes it is useful for itself and investors to review, as applicable, both GAAP information that includes the stock-based and deferred compensation expenses, restructuring charges, amortization of purchased intangibles, investment gains and losses and the related tax impact of all of these items, income tax adjustments, the income tax effect of the non-GAAP pre-tax adjustments from the provision for income taxes, and the non-GAAP measures that exclude such information in order to assess the performance of Adobe's business and for planning and forecasting in subsequent periods. Whenever Adobe uses such a non-GAAP financial measure, it provides a reconciliation of the non-GAAP financial measure to the most closely applicable GAAP financial measure. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measure as detailed above.

Our actual results could differ materially from our forward-looking statements in our comments and in this presentation. Factors that might cause or contribute to such differences include, but are not limited to, those discussed below. These and many other factors described in this report could adversely affect our operations, performance and financial condition.

If we cannot continue to develop, market and offer new products and services or upgrades or enhancements to existing products and services that meet customer requirements, our operating results could suffer.

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain; if we fail to anticipate customers' changing needs and emerging technological trends, our market share and results of operations could suffer. We must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect customer demand for our products and services. Our inability to extend our core technologies into new applications and new platforms, including the market for mobile, tablet and other IP-connected devices ("non-PC devices"), and to anticipate or respond to technological changes could affect continued market acceptance of our products and services and our ability to develop new products and services. Additionally, any delay in the development, production, marketing or offering of a new product or service or upgrade or enhancement to an existing product or service could cause a decline in our revenues, earnings or stock price and could weaken our competitive position. We maintain strategic relationships with third parties with respect to the distribution of certain of our technologies and the support of certain product functionality. If we are unsuccessful in establishing or maintaining our strategic relationships with these third parties, our ability to compete in the marketplace or to grow our revenues would be impaired and our operating results would suffer.

We offer our PC application-based products primarily on Windows and Macintosh platforms. To the extent that there is a continued slowdown of customer purchases of personal computers on either the Windows or Macintosh platform or in general, to the extent that we have difficulty transitioning product or version releases to new Windows and Macintosh operating systems, or to the extent that significant demand arises for our products or competitive products on other platforms before we choose and are able to offer our products on these platforms, our business could be harmed. To the extent new releases of operating systems, including for non-PC devices, or other third-party products, platforms or devices make it more difficult for our products to perform, and our customers are persuaded to use alternative technologies, our business could be harmed.

Introduction of new products, services and business models by existing and new competitors could harm our competitive position and results of operations.

The markets for our products and services are characterized by intense competition, evolving industry standards, emerging business and distribution models, disruptive software and hardware technology developments, frequent new product and service introductions, including limited functionality alternatives available at lower costs or free of charge, short product and service life cycles and price sensitivity on the part of consumers, all of which may result in downward pressure on pricing and gross margins and could adversely affect our renewal and upgrade rates. Our future success will depend on our ability to enhance our existing products and services, introduce new products and services on a timely and cost-effective basis, meet changing customer needs, extend our core technology into new applications, and anticipate and respond to emerging standards, business models, software delivery methods and other technological changes, such as the evolution and emergence of digital application marketplaces as a direct sales and software delivery environment. These digital application marketplaces often have exclusive distribution for certain platforms, which may make it more difficult for us to compete in these markets. If any competing products, services, or operating systems achieve widespread acceptance, our operating results could suffer. In addition, consolidation has occurred among some of the competitors in the markets in which we compete. Further consolidations in these markets may subject us to increased competitive pressures and may therefore harm our results of operations.

For additional information regarding our competition and the risks arising out of the competitive environment in which we operate, see the section entitled "Competition" contained in Item 1 of our FY2012 Annual Report on Form 10-K.

If we fail to successfully manage transitions to new business models and markets, our results of operations could be negatively impacted.

We plan to release numerous new product and service offerings and employ new software delivery methods in connection with our diversification into new business models and markets. It is uncertain whether these strategies will prove successful or whether we will be able to develop the necessary infrastructure and business models more quickly than our competitors. Market acceptance of these new product and service offerings will be dependent on our ability to (1) include functionality and usability in such releases that address certain customer requirements with which our operating history is not extensive, and (2) to optimally price our products in light of marketplace conditions, our costs and consumer demand. Some of these new product and service offerings could subject us to increased risk of legal liability related to the provision of services as well as cause us to incur significant technical, legal or other costs. For example, with our introduction of on-demand or cloud-based services and subscription-based licensing models, such as Creative Cloud, we are entering markets that are not yet fully mature.

Market acceptance of such services is affected by a variety of factors, including security, reliability, performance, social/community engagement, customer concerns with entrusting a third party to store and manage their data, public concerns regarding privacy and the enactment of laws or regulations that restrict our ability to provide such services to customers in the U.S. or internationally.

Additionally, customer requirements for open standards or open-source products could impact adoption or use of some of our products or services. To the extent we incorrectly predict customer requirements for such products or services, or if there is a delay in market acceptance of such products or services, our business could be harmed.

From time to time we open source certain of our technology initiatives, provide broader open access to our technology, license certain of our technology on a royalty-free basis, and release selected technology for industry standardization. These changes may have negative revenue implications and make it easier for our competitors to produce products or services similar to ours. If we are unable to respond to these competitive threats, our business could be harmed.

We are also devoting significant resources to the development of technologies and service offerings in markets where our operating history is not extensive, including cloud-based computing and non-PC device markets. These new offerings and markets require a considerable investment of technical, financial, compliance and sales resources, and a scalable organization. Many of our competitors may have advantages over us due to their larger presence, larger developer network, deeper experience in the cloud-based computing and non-PC device markets, and greater sales, consulting and marketing resources. If we are unable to successfully establish these new offerings in light of the competitive environment, our results of operations could be negatively impacted.

The increased emphasis on a cloud strategy may give rise to risks that could harm our business.

To accelerate the growth of our business, we launched our subscription-based Creative Cloud offering in fiscal 2012. As a result, we expect to derive an increasing portion of our revenues in the future from subscriptions to our creative tools and cloud-based offerings. This subscription model prices and delivers our products in a way that differs from the historical pricing and delivery methods of our creative tools. These changes reflect a shift from perpetual license sales and distribution of our software in favor of providing our customers the right to access certain of our software in a hosted environment or use downloaded software for a specified subscription period. As our customers' purchases trend away from perpetual licenses toward subscriptions, we are experiencing and will continue to experience a deferral of revenues and cash received from customers. This cloud strategy requires continued investment in product development and cloud operations, and may give rise to a number of risks, including the following:

- if new or current customers desire only perpetual licenses, our subscription sales may lag behind expectations;
- the increased emphasis on a cloud strategy may raise concerns among our installed perpetual license customer base;
- we may be unsuccessful in maintaining our target pricing, new seat adoption and projected renewal rates, or we may select a target price
 that is not optimal and could negatively affect our sales or earnings;
- our revenues are expected to decline over the short term and may decline over the long term as a result of this strategy;
- our shift to a subscription licensing model may result in confusion among our customers, partners, resellers and investors;
- our relationships with existing partners that resell perpetual license products may be damaged; and
- we may incur costs at a higher than forecasted rate as we expand our cloud operations.

Revenue from our product and service offerings may be difficult to predict.

As previously discussed, we are devoting significant resources to the development of product and service offerings as well as new distribution models where our operating history is not extensive. As our traditional perpetual license business shifts toward our subscription licensing model, our perpetual license revenue may decline more quickly than anticipated. Under a subscription model, downturns or upturns in sales may not be immediately reflected in our reported financial results. Subscription pricing allows customers to use our products at a lower initial cost when compared to the sale of a perpetual license. Although the subscription model is designed to increase the number of customers who purchase our products and services and create a recurring revenue stream that is more predictable, it creates certain risks related to the timing of revenue recognition and reduced cash flows.

As a result, a portion of the subscription-based revenue we report each quarter results from the recognition of deferred revenue relating to subscription agreements entered into during previous quarters. A decline in new or renewed subscriptions in any period may not be immediately reflected in our reported financial results for that period, but may result in a decline in our revenue in future quarters. If we were to experience significant downturns in subscription sales and renewal rates, our reported financial results might not reflect such downturns until future periods. A subscription model could also make it difficult for us to rapidly increase our revenues from subscription- or SaaS-based services through additional sales in any period, as revenue from new customers will be recognized over the applicable subscription term. Further, any

increases in sales under our subscription sales model could result in decreased revenues over the short term if they are offset by a decline in sales from perpetual license customers.

Additionally, in connection with our sales efforts to enterprise customers and our introduction of enterprise term license agreements, a number of factors could make our revenue less predictable, including longer than expected sales and implementation cycles, decisions to open source certain of our technology initiatives, potential deferral of revenue due to multiple-element revenue arrangements and alternate licensing arrangements. If any of our assumptions about revenue from our new businesses or our addition of a subscription-based model prove incorrect, our actual results may vary materially from those anticipated, estimated or projected.

We may be unable to predict subscription renewal or upgrade rates and the impact these rates may have on our future revenue and operating results.

The SaaS business model we utilize in our Adobe Marketing Cloud offerings typically involves selling services on a subscription basis pursuant to service agreements that are generally one to three years in length, our Creative Cloud subscription agreements are generally month to month or one year in length, and subscription agreements for other products and services may provide for shorter or longer terms. Although many of our service and subscription agreements contain automatic renewal terms, our customers have no obligation to renew their subscriptions for our services after the expiration of their initial subscription period, and some customers elect not to renew. We cannot provide assurance that these subscriptions will be renewed at the same or higher level of service, for the same number of seats or for the same duration of time, if at all. Moreover, under certain circumstances, some of our customers have the right to cancel their service agreements prior to the expiration of the terms of their agreements. We cannot be assured that we will be able to accurately predict future customer renewal rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their satisfaction or dissatisfaction with our services, the prices of our services, the prices of services offered by our competitors, mergers and acquisitions affecting our customer base, reductions in our customers' spending levels, or declines in consumer activity as a result of economic downturns or uncertainty in financial markets. If our customers do not renew their subscriptions for our services or if they renew on less favorable terms to us, our revenues may decline.

Our future growth is also affected by our ability to sell additional features and services to our current customers, which depends on a number of factors, including our customers' satisfaction with our services, the prices of our services and general economic conditions. If our efforts to cross-sell and upsell to our customers are unsuccessful, the rate at which our business grows might decline.

Uncertainty about current and future economic conditions and other adverse changes in general political conditions in any of the major countries in which we do business could adversely affect our operating results.

As our business has grown, we have become increasingly subject to the risks arising from adverse changes in economic and political conditions, both domestically and globally. Uncertainty about current and future economic and political conditions on us, our customers, suppliers and partners, makes it difficult for us to forecast operating results and to make decisions about future investments. If economic growth in the U.S., Europe and other countries slows or does not improve, or if the U.S., Europe or other countries in which we do business experience further economic recessions, many customers may delay or reduce technology purchases, advertising spending or marketing spending. This could result in reductions in sales of our products and services, longer sales cycles, slower adoption of new technologies and increased price competition. Deterioration in economic conditions in any of the countries in which we do business could also cause slower or impaired collections on accounts receivable, which may adversely impact our liquidity and financial condition.

There could be a number of effects from a financial institution credit crisis on our business, which could include impaired credit availability and financial stability of our customers, including our distribution partners and channels. A disruption in the financial markets may also have an effect on our derivative counterparties and could also impair our banking partners on which we rely for operating cash management. Any of these events would likely harm our business, results of operations and financial condition.

Political instability in any of the major countries in which we do business would also likely harm our business, results of operations and financial condition.

We may not realize the anticipated benefits of past or future acquisitions, and integration of these acquisitions may disrupt our business and management.

We have in the past and may in the future acquire additional companies, products or technologies. We acquired Omniture in October 2009, Day Software ("Day") in October 2010 and Efficient Frontier in January 2012, as well as other smaller business and asset acquisitions. We may not realize the anticipated benefits of an acquisition, each of which involves numerous risks. These risks include:

difficulty in integrating the operations and personnel of the acquired company;

difficulty in effectively integrating the acquired technologies, products or services with our current technologies, products or services;

- difficulty in maintaining controls, procedures and policies during the transition and integration;
- entry into markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;
- disruption of our ongoing business and distraction of our management and employees from other opportunities and challenges;
- difficulty integrating the acquired company's accounting, management information, human resources and other administrative systems;
- inability to retain personnel of the acquired business;
- inability to retain key customers, distributors, vendors and other business partners of the acquired business;
- inability to achieve the financial and strategic goals for the acquired and combined businesses;
- inability to take advantage of anticipated tax benefits as a result of unforeseen difficulties in our integration activities;
- incurring acquisition-related costs or amortization costs for acquired intangible assets that could impact our operating results;
- potential additional exposure to fluctuations in currency exchange rates;
- potential impairment of our relationships with employees, customers, partners, distributors or third-party providers of our technologies, products or services;
- potential failure of the due diligence processes to identify significant problems, liabilities or other shortcomings or challenges of an acquired company or technology, including but not limited to, issues with the acquired company's intellectual property, product quality or product architecture, data back-up and security (including security from cyber-attacks), privacy practices, revenue recognition or other accounting practices, employee, customer or partner issues or legal and financial contingencies;
- exposure to litigation or other claims in connection with, or inheritance of claims or litigation risk as a result of, an acquisition, including but
 not limited to, claims from terminated employees, customers, former stockholders or other third parties;
- incurring significant exit charges if products or services acquired in business combinations are unsuccessful;
- potential inability to assert that internal controls over financial reporting are effective;
- potential inability to obtain, or obtain in a timely manner, approvals from governmental authorities, which could delay or prevent such acquisitions;
- potential delay in customer and distributor purchasing decisions due to uncertainty about the direction of our product and service offerings;
 and
- potential incompatibility of business cultures.

Mergers and acquisitions of high technology companies are inherently risky, and ultimately, if we do not complete an announced acquisition transaction or integrate an acquired business successfully and in a timely manner, we may not realize the benefits of the acquisition to the extent anticipated.

We may incur substantial costs enforcing or acquiring intellectual property rights and defending against third-party claims as a result of litigation or other proceedings.

In connection with the enforcement of our own intellectual property rights, the acquisition of third-party intellectual property rights, or disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation are typically very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved past litigation and disputes, we may not prevail in any ongoing or future litigation and disputes. Third-party intellectual property disputes, including those emanating from non-practicing entities, could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers including contractual provisions under various license arrangements and service agreements. In addition, we may incur significant costs in acquiring the necessary third-party intellectual property rights for use in our products. Any of these occurrences could seriously harm our business.

We may not be able to protect our intellectual property rights, including our source code, from third-party infringers or unauthorized copying, use or disclosure.

Although we defend our intellectual property rights and combat unlicensed copying, access and use of software and intellectual property through a variety of techniques, preventing unauthorized use or infringement of our rights is inherently difficult. We actively combat software piracy as part of our enforcement of our intellectual property rights, but we nonetheless lose significant revenue due to illegal use of our software. If piracy activities increase, it may further harm our business.

Additionally, we take significant measures to protect the secrecy of our confidential information and trade secrets, including our source code. If unauthorized disclosure of our source code occurs through security breach, attack or otherwise, we could potentially lose future trade secret protection for that source code. The loss of future trade secret protection could make it easier for third parties to compete with our products by copying functionality, which could adversely affect our revenue and operating margins. We also seek to protect our confidential information and trade secrets through the use of non-disclosure agreements with our customers, contractors, vendors and partners. However, there is a risk that our confidential information and trade secrets may be disclosed or published without our authorization, and in these situations it may be difficult and/or costly for us to enforce our rights.

Increasing regulatory focus on privacy issues and expanding laws and regulations could impact our new business models and expose us to increased liability.

Our new business models are more highly regulated, including for privacy and data security. We are also expanding these new models in countries that have more stringent data protection laws than those in the U.S. With these new business models, our liability exposure, compliance requirements and costs associated with privacy issues will likely increase. Privacy laws globally are changing and evolving. Governments, privacy advocates and class action attorneys are increasingly scrutinizing how companies collect, process, use, store, share or transmit personal data. New laws and industry self-regulatory codes have been enacted and more are being considered that may affect our ability to reach current and prospective consumers, to understand how our products and services are being used, to respond to consumer requests allowed under the laws, and to implement our new business models effectively. These new laws and regulations would similarly affect our competitors as well as our customers. Any perception of our practices or products as an invasion of privacy, whether or not consistent with current regulations and industry practices, may subject us to public criticism, class action lawsuits, reputational harm or claims by regulators, industry groups or other third parties, all of which could disrupt our business and expose us to increased liability.

On behalf of certain of our customers using some of our services, we collect and store information derived from the activities of website visitors, which may include anonymous and/or personal information. This enables us to provide such customers with reports on aggregated anonymous or personal information from and about the visitors to their websites in the manner specifically directed by each such individual customer. Federal, state and foreign governments and agencies have adopted or are considering adopting laws regarding the collection, use and disclosure of this information. Our compliance with privacy laws and regulations and our reputation among the public body of website visitors depend on such customers' adherence to privacy laws and regulations and their use of our services in ways consistent with such visitors' expectations. We also rely on representations made to us by customers that their own use of our services and the information they provide to us via our services do not violate any applicable privacy laws, rules and regulations or their own privacy policies. We ask customers to represent to us that they provide their website visitors the opportunity to "opt-out" of the information collection associated with our services, as applicable. We do not formally audit such customers to confirm compliance with these representations. If these representations are false or if such customers do not otherwise comply with applicable privacy laws, we could face potentially adverse publicity and possible legal or other regulatory action. In addition, some countries are considering enacting laws that would expand the scope of privacy-related obligations required of service providers, such as Adobe, that would require additional compliance expense and increased liability.

Security vulnerabilities in our products and systems could lead to reduced revenues or to liability claims.

Maintaining the security of our products, computers and networks is a critical issue for us and our customers. Security researchers, criminal hackers and other third parties regularly develop new techniques to penetrate computer and network security measures. In addition, hackers also develop and deploy viruses, worms and other malicious software programs, some of which may be specifically designed to attack our products, systems, computers or networks. Additionally, outside parties may attempt to fraudulently induce our employees or users of our products to disclose sensitive information in order to gain access to our data or our customers' data. These potential breaches of our security measures and the accidental loss, inadvertent disclosure or unauthorized dissemination of proprietary information or sensitive, personal or confidential data about us, our employees or our customers, including the potential loss or disclosure of such information or data as a result of hacking, fraud, trickery or other forms of deception, could expose us, our employees, our customers or the individuals affected to a risk of loss or misuse of this information, result in litigation and potential liability or fines for us, damage our brand and reputation or otherwise harm our business.

Although these are industry-wide problems that affect computers and products across all platforms, they affect our products in particular because hackers tend to focus their efforts on the most popular operating systems and programs and we expect them to continue to do so. Critical vulnerabilities may be identified in certain of our applications. These vulnerabilities could cause such applications to crash and could potentially allow an attacker to take control of the affected system, which could result in liability to us or limit our ability to conduct our business and deliver our products and services to customers. We devote significant resources to address security vulnerabilities through engineering more secure products, enhancing security and reliability features in our products and systems, code hardening, conducting rigorous penetration tests, deploying security updates to address security vulnerabilities and improving our incident response time. The cost of these steps could reduce our

operating margins. Despite these efforts, actual or perceived security vulnerabilities in our products and systems may lead to claims against us and harm our reputation, and could lead some customers to seek to return products, to stop using certain services, to reduce or delay future purchases of products or services, or to use competing products or services. Customers may also increase their expenditures on security measures designed to protect their existing computer systems from attack, which could delay adoption of new technologies. Further, if we or our customers are subject to an attack, or our technology is utilized in a third-party attack, it may be necessary for us to take certain measures and make certain expenditures to take appropriate responsive and preventative steps. Any of these actions by customers could adversely affect our revenues.

Some of our lines of business rely on us or our third-party service providers to host and deliver services and data, and any interruptions or delays in these hosted services, security or privacy breaches, or failures in data collection could expose us to liability and harm our business and reputation.

Some of our lines of business and services, including our online store at adobe.com, our Creative Cloud offering, our hosted Digital Media offerings and our Adobe Marketing Cloud offerings, rely on services hosted and controlled directly by us or by third parties. Because we hold large amounts of customer data, some of which is hosted in third-party facilities, a security incident may compromise the confidentiality, integrity or availability of customer data. Unauthorized access to customer data may be obtained through break-ins, breach of our secure network by an unauthorized party, employee theft or misuse, or other misconduct. It is also possible that unauthorized access to customer data may be obtained through inadequate use of security controls by customers. While our products and services provide and support strong password controls, IP restriction and account controls, their use is controlled by the customer. As such, this could allow accounts to be created with weak passwords, which could result in allowing an attacker to gain access to customer data. Additionally, failure by customers to remove accounts of their own employees, or granting of accounts by the customer in an uncontrolled manner, may allow for access by former or unauthorized customer employees. If there were ever an inadvertent disclosure of personal information, or if a third party were to gain unauthorized access to the personal information we possess on behalf of our customers, our operations could be disrupted, our reputation could be harmed and we could be subject to claims or other liabilities. In addition, such perceived or actual unauthorized disclosure of the information we collect or breach of our security could damage our reputation, result in the loss of customers and harm our business.

Because of the large amount of data that we collect and manage on behalf of our customers, it is possible that hardware or software failures or errors in our systems (or those of our third-party service providers) could result in data loss or corruption or cause the information that we collect to be incomplete or contain inaccuracies that our customers regard as significant. Furthermore, our ability to collect and report data may be delayed or interrupted by a number of factors, including access to the internet, the failure of our network or software systems, security breaches or significant variability in visitor traffic on customer websites. In addition, computer viruses may harm our systems causing us to lose data, and the transmission of computer viruses could expose us to litigation. We may also find, on occasion, that we cannot deliver data and reports to our customers in near real time because of a number of factors, including significant spikes in consumer activity on their websites or failures of our network or software. We may be liable to our customers for damages they may incur resulting from these events, such as loss of business, loss of future revenues, breach of contract or for the loss of goodwill to their business. In addition to potential liability, if we supply inaccurate information or experience interruptions in our ability to capture, store and supply information in near real time or at all, our reputation could be harmed and we could lose customers.

Failure to manage our sales and distribution channels and third-party customer service and technical support providers effectively could result in a loss of revenue and harm to our business.

A significant amount of our revenue for application products is from one distributor, Ingram Micro, Inc., which represented 11% of our net revenue for fiscal 2012. We have multiple non-exclusive, independently negotiated distribution agreements with Ingram Micro and its subsidiaries covering our arrangements in specified countries and regions. Each of these contracts has an independent duration, is independent of any other agreement (such as a master distribution agreement) and any termination of one agreement does not affect the status of any of the other agreements. In fiscal 2012, no single agreement with this distributor was responsible for over 5% of our total net revenue. If any one of our agreements with this distributor were terminated, we believe we could make arrangements with new or existing distributors to distribute our products without a substantial disruption to our business; however, any prolonged delay in securing a replacement distributor could have a negative short-term impact on our results of operations.

Successfully managing our indirect channel efforts to reach various potential customer segments for our products and services is a complex process across the broad range of geographies where we do business. Our distributors and other channel partners are independent businesses that we do not control. Notwithstanding the independence of our channel partners, we face potential legal risk and reputational harm from the activities of these third parties including, but not limited to, export control violations, workplace conditions, corruption and anti-competitive behavior. Although we have undertaken efforts to reduce these third-party risks, they remain present. We cannot be certain that our distribution channel will continue to market or sell our products effectively. If our distribution channel is not successful, we may lose sales opportunities, customers and revenues.

Our distributors also sell our competitors' products, and if they favor our competitors' products for any reason, they may fail to market our products as effectively or to devote resources necessary to provide effective sales, which would cause our results to suffer. We also distribute some products through our OEM channel, and if our OEMs decide not to bundle our applications on their devices, our results could suffer.

In addition, the financial health of our distributors and our continuing relationships with them are important to our success. Some of these distributors may be adversely impacted by changes to our business model and practices, such as our launch of Creative Cloud, including our release of Creative Cloud offerings for teams and enterprises, or unable to withstand adverse changes in current economic conditions, which could result in insolvency and/or the inability of such distributors to obtain credit to finance purchases of our products. In addition, weakness in the end-user market could further negatively affect the cash flows of our distributors who could, in turn, delay paying their obligations to us, which would increase our credit risk exposure. Our business could be harmed if the financial condition of some of these distributors substantially weakened and we were unable to timely secure replacement distributors.

We also sell certain of our products and services through our direct sales force. Risks associated with this sales channel include longer sales and collection cycles associated with direct sales efforts, challenges related to hiring, retaining and motivating our direct sales force, and substantial amounts of training for sales representatives, including regular updates to cover new and upgraded systems, products and services. Moreover, our recent hires and sales personnel added through our recent business acquisitions may not become as productive as we would like, as in most cases it takes a significant period of time before they achieve full productivity. Our business could be seriously harmed if these expansion efforts do not generate a corresponding significant increase in revenues and we are unable to achieve the efficiencies we anticipate. In addition, the loss of key sales employees could impact our relationships and future ability to sell to certain of these accounts covered by such employees.

We also provide products and services, directly and indirectly, to a variety of governmental entities, both domestically and internationally. Risks associated with licensing and selling products and services to governmental entities include longer sales cycles associated with selling to diverse governmental entities, varying governmental budgeting processes and timelines and adherence to potentially complex specific procurement regulations and other requirements. Ineffectively managing these risks could result in the potential assessment of penalties and fines, harm to our reputation and lost sales opportunities to such governmental entities.

We outsource a substantial portion of our customer service and technical support activities to third-party service providers. We rely heavily on these third-party customer service and technical support representatives working on our behalf and we expect to continue to rely heavily on third parties in the future. This strategy provides us with lower operating costs and greater flexibility, but also presents risks to our business, including the possibilities that we may not be able to influence the quality of support that we provide as directly as we would be able to do in our own company-run call centers, and that our customers may react negatively to providing information to, and receiving support from, third-party organizations, especially if based overseas. If we encounter problems with our third-party customer service and technical support providers, our reputation may be harmed and our revenue may be adversely affected.

Catastrophic events may disrupt our business.

We are a highly automated business and rely on our network infrastructure and enterprise applications, internal technology systems and our website for our development, marketing, operational, support, hosted services and sales activities. In addition, some of our businesses rely on third-party hosted services and we do not control the operation of third-party data center facilities serving our customers from around the world, which increases our vulnerability. A disruption, infiltration or failure of these systems or third-party hosted services in the event of a major earthquake, fire, flood, power loss, telecommunications failure, software or hardware malfunctions, cyber-attack, war, terrorist attack or other catastrophic event could cause system interruptions, reputational harm, loss of intellectual property, delays in our product development, lengthy interruptions in our services, breaches of data security and loss of critical data and could prevent us from fulfilling our customers' orders. Our corporate headquarters, a significant portion of our research and development activities, certain of our data centers and certain other critical business operations are located in the San Francisco Bay Area, and additional facilities where we conduct significant operations are located in the Salt Lake Valley Area, both of which are near major earthquake faults. We have developed certain disaster recovery plans and backup systems to reduce the potentially adverse effect of such events, but a catastrophic event that results in the destruction or disruption of any of our data centers or our critical business or information technology systems could severely affect our ability to conduct normal business operations and, as a result, our future operating results could be adversely affected.

Net revenue, margin or earnings shortfalls or the volatility of the market generally may cause the market price of our stock to decline.

The market price for our common stock has experienced significant fluctuations and may continue to fluctuate significantly. A number of factors may affect the market price for our common stock, including:

shortfalls in our revenue, margins, earnings or key performance metrics;

 confusion on the part of industry analysts and investors about the long-term impact to our business resulting from our subscription offerings;

- shortfalls in the number of paid, active Creative Cloud subscribers and ARR;
- changes in estimates or recommendations by securities analysts;
- the announcement of new products, product enhancements or service introductions by us or our competitors;
- seasonal variations in the demand for our products and services and the implementation cycles for our new customers;
- the loss of a large customer or our inability to increase sales to existing customers and attract new customers;
- variations in our or our competitors' results of operations, changes in the competitive landscape generally and developments in our industry; and
- unusual events such as significant acquisitions, divestitures, litigation, general socio-economic, regulatory, political or market conditions and other factors, including factors unrelated to our operating performance.

We are subject to risks associated with compliance with laws and regulations globally which may harm our business.

We are a global company subject to varied and complex laws, regulations and customs domestically and internationally. These laws and regulations relate to a number of aspects of our business, including trade protection, import and export control, data and transaction processing security, records management, employee data privacy, user-generated content hosted on websites we operate, corporate governance, employee and third-party complaints, gift policies, conflicts of interest, employment and labor relations laws, securities regulations and other regulatory requirements affecting trade and investment. The application of these laws and regulations to our business is often unclear and may at times conflict. Compliance with these laws and regulations may involve significant costs or require changes in our business practices that result in reduced revenue and profitability. Non-compliance could also result in fines, damages, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business, and damage to our reputation. We incur additional legal compliance costs associated with our global operations and could become subject to legal penalties if we fail to comply with local laws and regulations in U.S. jurisdictions or in foreign countries, which laws and regulations may be substantially different from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by U.S. regulations applicable to us such as the Foreign Corrupt Practices Act. Although we implement policies and procedures designed to ensure compliance with these laws, there can be no assurance that all of our employees, contractors and agents, as well as those companies to which we outsource certain of our business operations, including those based in or from countries where practices that violate such U.S. laws may be customary, will not take actions in violation of our internal policies. Any such violation, even i

As a global business that generates approximately 50% of our total revenue from sales to customers outside of the Americas, we are subject to a number of risks, including:

- foreign currency fluctuations;
- changes in government preferences for software procurement;
- international economic, political and labor conditions;
- tax laws (including U.S. taxes on foreign subsidiaries);
- increased financial accounting and reporting burdens and complexities;
- unexpected changes in, or impositions of, legislative or regulatory requirements;
- failure of laws to protect our intellectual property rights adequately;
- inadequate local infrastructure and difficulties in managing and staffing international operations;
- delays resulting from difficulty in obtaining export licenses for certain technology, tariffs, quotas and other trade barriers and restrictions;
- the imposition of governmental economic sanctions on countries in which we do business or where we plan to expand our business;
- transportation delays;
- operating in locations with a higher incidence of corruption and fraudulent business practices; and
- other factors beyond our control, including terrorism, war, natural disasters and pandemics.

If sales to any of our customers outside of the Americas are delayed or canceled because of any of the above factors, our revenue may be negatively impacted.

In addition, approximately 48% of our employees are located outside the U.S. Accordingly, we are exposed to changes in laws governing our employee relationships in various U.S. and foreign jurisdictions, including laws and regulations regarding wage and hour requirements, fair labor standards, employee data privacy, unemployment tax rates, workers' compensation rates, citizenship requirements and payroll and other taxes, which likely would have a direct impact on our operating costs. We also intend to continue expansion of our international operations and international sales and marketing activities. Expansion in international markets has required, and will continue to require, significant

management attention and resources. We may be unable to scale our infrastructure effectively or as quickly as our competitors in these markets, and our revenues may not increase to offset these expected increases in costs and operating expenses, which would cause our results to suffer.

We may incur losses associated with currency fluctuations and may not be able to effectively hedge our exposure.

Our operating results are subject to fluctuations in foreign currency exchange rates. We attempt to mitigate a portion of these risks through foreign currency hedging, based on our judgment of the appropriate trade-offs among risk, opportunity and expense. We have established a hedging program to partially hedge our exposure to foreign currency exchange rate fluctuations for various currencies. If the foreign currency hedging markets are negatively affected by clearing and trade execution regulations imposed by the Dodd-Frank Wall Street Reform and Consumer Protection Act, the cost of hedging our foreign exchange exposure could increase.

We regularly review our hedging program and make adjustments as necessary based on the judgment factors discussed above. Our hedging activities may not offset more than a portion of the adverse financial impact resulting from unfavorable movement in foreign currency exchange rates, which could adversely affect our financial condition or results of operations.

We have issued \$1.5 billion of notes in a debt offering and may incur other debt in the future, which may adversely affect our financial condition and future financial results.

In the first quarter of fiscal 2010, we issued \$1.5 billion in senior unsecured notes. We also have a \$1.0 billion revolving credit facility, which is currently undrawn. Although we have no current plans to request any advances under this credit facility, we may use the proceeds of any future borrowing for general corporate purposes, or for future acquisitions or expansion of our business.

This debt may adversely affect our financial condition and future financial results by, among other things:

- requiring the dedication of a portion of our expected cash from operations to service our indebtedness, thereby reducing the amount of
 expected cash flow available for other purposes, including capital expenditures and acquisitions; and
- limiting our flexibility in planning for, or reacting to, changes in our business and our industry.

Our senior unsecured notes and revolving credit facility impose restrictions on us and require us to maintain compliance with specified covenants. Our ability to comply with these covenants may be affected by events beyond our control. If we breach any of the covenants and do not obtain a waiver from the lenders or noteholders, then, subject to applicable cure periods, any outstanding indebtedness may be declared immediately due and payable.

In addition, changes by any rating agency to our credit rating may negatively impact the value and liquidity of both our debt and equity securities. Under certain circumstances, if our credit ratings are downgraded or other negative action is taken, the interest rate payable by us under our revolving credit facility could increase. Downgrades in our credit ratings could also restrict our ability to obtain additional financing in the future and could affect the terms of any such financing.

Changes in, or interpretations of, accounting principles could have a significant impact on our financial position and results of operations.

We prepare our Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"). These principles are subject to interpretation by the SEC and various bodies formed to interpret and create appropriate accounting principles. A change in these principles can have a significant effect on our reported results and may even retroactively affect previously reported transactions.

For example, the U.S.-based Financial Accounting Standards Board ("FASB") is currently working together with the International Accounting Standards Board ("IASB") on several projects to further align accounting principles and facilitate more comparable financial reporting between companies who are required to follow GAAP under SEC regulations and those who are required to follow International Financial Reporting Standards outside of the U.S. These efforts by the FASB and IASB may result in different accounting principles under GAAP that may result in materially different financial results for us in areas including, but not limited to, principles for recognizing revenue and lease accounting.

If our goodwill or amortizable intangible assets become impaired we may be required to record a significant charge to earnings.

Under GAAP, we review our goodwill and amortizable intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. GAAP requires us to test for goodwill impairment at least annually. Factors that may be considered a change in circumstances indicating that the carrying value of our goodwill or amortizable intangible assets may not be recoverable include a decline in stock price and market capitalization, future cash flows and slower growth rates in our industry. We may be required to record a

significant charge to earnings in our financial statements during the period in which any impairment of our goodwill or amortizable intangible assets is determined, resulting in an impact on our results of operations.

Changes in, or interpretations of, tax rules and regulations may adversely affect our effective tax rates.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the United States, we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the United States. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings.

Our income tax expense has differed from the tax computed at the U.S. federal statutory income tax rate due primarily to discrete items and to earnings considered as permanently reinvested in foreign operations. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by unanticipated decreases in the amount of earnings in countries with low statutory tax rates, by lapses of the availability of the U.S. research and development tax credit, or by changes in the valuation of our deferred tax assets and liabilities.

In addition, we are subject to the continual examination of our income tax returns by the Internal Revenue Service ("IRS") and other domestic and foreign tax authorities, including a current examination by the IRS of our fiscal 2008 and 2009 tax returns. These examinations are expected to focus on our intercompany transfer pricing practices as well as other matters. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, there can be no assurance that the final determination of any of these examinations will not have an adverse effect on our operating results and financial position.

If we are unable to recruit and retain key personnel our business may be harmed.

Much of our future success depends on the continued service and availability of our senior management. These individuals have acquired specialized knowledge and skills with respect to Adobe. The loss of any of these individuals could harm our business. Our business is also dependent on our ability to retain, hire and motivate talented, highly skilled personnel across all levels of our organization. Experienced personnel in the information technology industry are in high demand and competition for their talents is intense in many areas where our employees are located. If we are unable to continue to successfully attract and retain key personnel, our business may be harmed. Effective succession planning is also a key factor for our long-term success. Our failure to enable the effective transfer of knowledge and facilitate smooth transitions with regards to our key employees could adversely affect our long-term strategic planning and execution.

We believe that a critical contributor to our success to date has been our corporate culture, which we have built to foster innovation and teamwork. As we grow, including from the integration of employees and businesses acquired in connection with our previous or future acquisitions, we may find it difficult to maintain important aspects of our corporate culture which could negatively affect our ability to retain and recruit personnel and otherwise adversely affect our future success.

Our investment portfolio may become impaired by deterioration of the capital markets.

Our cash equivalent and short-term investment portfolio as of November 30, 2012 consisted of corporate bonds and commercial paper, foreign government securities, money market mutual funds and repurchase agreements, municipal securities, time deposits, U.S. agency securities and U.S. Treasury securities. We follow an established investment policy and set of guidelines to monitor and help mitigate our exposure to interest rate and credit risk. The policy sets forth credit quality standards and limits our exposure to any one issuer, as well as our maximum exposure to various asset classes.

Should financial market conditions worsen in the future, investments in some financial instruments may pose risks arising from market liquidity and credit concerns. In addition, any deterioration of the capital markets could cause our other income and expense to vary from expectations. As of November 30, 2012, we had no material impairment charges associated with our short-term investment portfolio, and although we believe our current investment portfolio has little risk of material impairment, we cannot predict future market conditions or market liquidity, or credit availability, and can provide no assurance that our investment portfolio will remain materially unimpaired.
